15A. NAME AND TITLE OF SIGNER (type or print)				16A. NAME AND TITLE OF SIGNER (type or print)			
15B. CONTRACTOR/OFFEROR		15C. DATE SIGNED		16B. UNITED STATES OF AMERICA		16C. DATE SIGNED	
_____ (Signature of person authorized to sign)				_____ (Signature of Contracting Officer)			

Question:

We are preparing our proposal for the above-mentioned solicitation but cannot find any information regarding the upgrade kits the US Navy will supply. If possible, please forward the details of these kits so we can ensure our pricing reflects the supply of these items. We are looking for what each kit consists of. This could affect the parts we price out for the proposal.

Answer:

Section 3.6, 2nd paragraph, Page 12 of 45 provides the a U.S. Navy marine gas turbine website, <https://mgt.navsses.navy.mil>, that contains all applicable gas turbine upgrade technical directive instructions. Based solely on the review of the engine logbooks for the development of the solicitation, the list of mandatory gas turbine upgrade kits that are required to be installed on the engines is provided in Table 2 (Pages 7-8) of the solicitation. The material for these upgrade kits will be provided by the U.S. Navy at no cost to the contractor with the exception of GTCs 75, 78R1 and 89. The list of material for the upgrade kits not provided by the U.S. Navy which the contractor should consider when developing their proposal can also be obtained at our website by downloading the PDF files for LM2500 GTCs 75, 78R1 and 89. Please refer to the Supply Data section of each technical directive for a complete listing of material required to install the upgrade.

Question:

Regarding the Combustor (para. 3.5.3), do either of the two LM2500 Gas Turbines currently have an HS 188 dome installed?" An examination of their log books doesn't indicate whether they have hastelloy domes or HS 188 domes.

Answer:

Since both gas generators are older configuration (twin shank) LM2500 gas generators, it is highly unlikely that either engine has a HS 188 dome currently installed. However this cannot be confirmed until after the contractor completes the teardown and inspection portion of the engine overhaul contract. For estimating purposes, the contractor should assume that the engines do not have a HS 188 dome currently installed.

All other terms and conditions remain the same.
